*The passion for what we do is a key component of how we develop and manufacture our products.*

*Cipriani Profilati, a family-run group, believes in research and development to ensure a continuous improvement of its products, services and offers. The passion for what we do is a key component of how we develop and manufacture our products. The development of new building systems is the result of constant study and of the ability to innovate. While developing each of our new products (profiles, accessories, ceiling grid...), we take into consideration the ease of installation and customer satisfaction.*

Pounds of steel used in production per year

- 1900**  
Early '900: chemistry, engineering, food and typography
- 1961**  
Started in 1961, production of cold-formed profiles
- 1975**  
Drywall metal warping production
- 1988**  
Automation development in productive process
- 2000**  
New 8000 m<sup>2</sup> production plant
- 2002**  
Launch of suspended ceiling systems
- 2007**  
12.000 m<sup>2</sup> expansion of production plant
- 2013**  
New braches in UK, Scandinavia and Brasil
- 2015**  
Launch of Teetanium Ceiling System
- 2016**  
Launch of metal posts for vineyard use
- 2017**  
New branch in Mexico
- 2023**  
New branch USA-Houston, TX

## Fully automated production line

Internal Slitting Line  
Patented Technical Inventions

## Quality system

ISO 9001 Certified  
ICC-ES Approved  
Internal Laboratory Testing

## Research and development

Internal research lab  
Continuous development of new products  
Improvement in technology  
New patents registered every year

## Sustainability

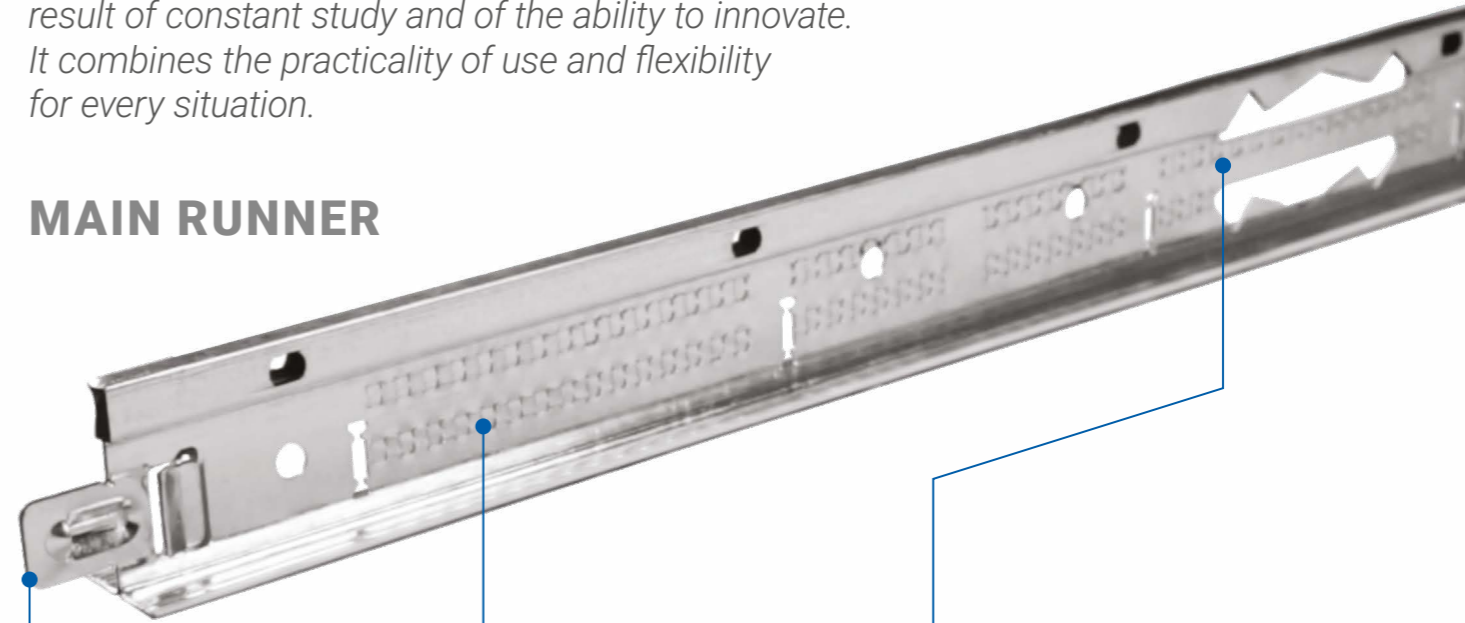

Reduced Carbon Footprint  
Use of Recycled Steel (High Percentage of Recycled Steel)  
Photovoltaic Self-Consumption  
EPD Membership  
Certified B-Corporation

# Teetanium<sup>®</sup> System

The development of new ceiling systems is the result of constant study and of the ability to innovate. It combines the practicality of use and flexibility for every situation.

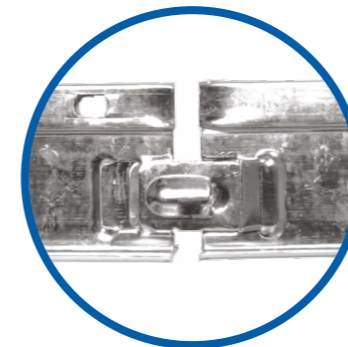

## MAIN RUNNER

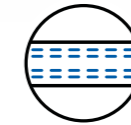

### DEMOUNTABLE CLIP SYSTEM

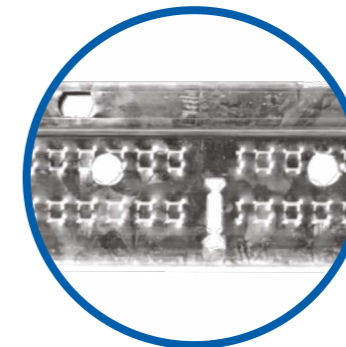

Easy installing  
Easy demounting  
No tool required

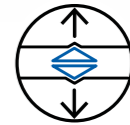

### DOUBLE STRENGTHEN STITCHING

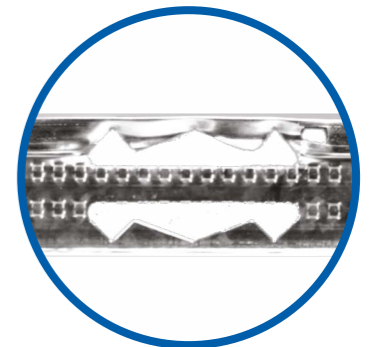

More torsion strength  
Makes the profile extremely rigid  
Faster aligning  
Less risks of bending damage

### FIRE EXPANSION NOTCH

Maximum expansion  
Performance in case of fire

# Teetanium<sup>®</sup> System

## NEW CROSS TEE

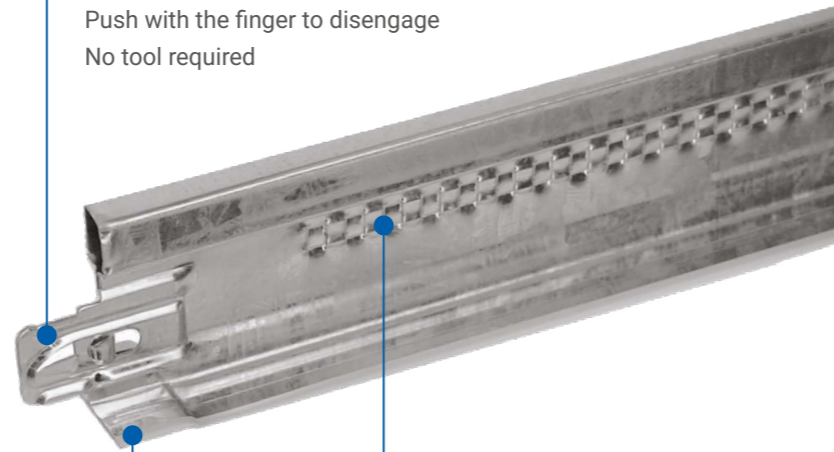

*In addition to the distinctive audible "click", which determines the perfect installation of the grid, this new grid system has various innovative features protected by seven international patents. The new integral clip has been designed to ensure maximum strength and greater safety once the main runner and cross tees are assembled.*

CIPRIANI GROUP | PRODUCT

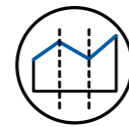

### NEW PATENTED CLIP

Easy demounting  
Push with the finger to disengage  
No tool required

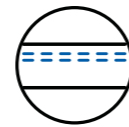

### LONG OVERLAP

Easier to find the hole sliding on top of the table  
Easier to make level changes in ceilings

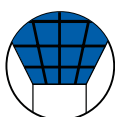

### STRENGTHEN STITCHING

More torsion strength  
Makes the profile extremely rigid  
Less risks of bending damage

# Teetanium<sup>®</sup> System

*Cipriani Profilati production plant is based in Trentino, a region renowned for its mountain scenery and extraordinary climate in a special part of the Alps. Our commitment to the future is to keep our production process sustainable and environmentally friendly, this is a matter of duty and pride for us.*
